Graduated from Alura as a Backend Web Developer, I have 4 years of experience as a full-stack programmer and in the development of web applications using various technologies.

Skills

- **English:** B2
- **Agile Methodologies:** I have experience working in teams using agile methodologies like Scrum.
- **Communication:** I have the ability to communicate effectively with other team members and stakeholders.
- **Problem Solving:** I have experience in problem-solving through code refactoring, applying best practices, and writing clean and maintainable code.

Academic Background

English   platzi

Backend Web Development with Java : (08/10/22) (05/05/23)   Alura

- Backend Web Development, acquiring skills in programming, RESTful APIs, databases, and web application security, among others.

Projects

Development of Authentication and Authorization Application with JWT
- I developed an authentication and authorization application using JSON Web Tokens (JWT), ensuring the security of users and controlled access to sensitive resources.

Weather Application Development
- I developed a weather application with React, integrating an API to obtain real-time weather data. The app allows users to search and visualize the weather of various locations interactively.
